Overview

One website that does two jobs - it sells your products online and showcases your services. On the shop side, customers browse products, add to cart and check out securely with an integrated payment gateway or Cash on Delivery. On the services side, each service has its own page with details and an enquiry / booking button that reaches you over WhatsApp and email. We set up up to 30 listings in total (products + services). A full backend admin panel lets you manage products, services, categories, orders and enquiries from one place. The site is responsive and SEO-friendly, and hosting for the first year is free from our side. The domain is arranged by you (not included), and we help connect it.
