Chatrabhuj Traders Online Store

Grocery Store + Admin Panel

Online grocery store with full admin panel & payment gateway

QUOTATION NO.	DATE	VALID UNTIL	PREPARED FOR
BV-Q-2026-034	23 Oct 2026	07 Nov 2026	Chatrabhuj Traders

Overview

A complete online grocery store for Chatrabhuj Traders, built for the way grocery actually sells. Customers browse by category and sub-category - fruits & vegetables, dairy, staples, snacks, beverages, household and personal care - pick the pack size they want (500g, 1kg, 5kg and so on, each with its own price), add items to the cart and check out paying securely by UPI, card or net banking, or with Cash on Delivery. The store checks whether you deliver to their pincode, lets them choose a delivery slot, and applies your minimum order value and coupon codes. Customers can create an account, see their order history and reorder their usual basket in one tap, and they get order updates on WhatsApp. Running it all is a full admin panel: products, categories, stock, prices and offers, every order with its payment status, customers, delivery areas and slots, banners and sales reports. We set up the first 100 products for you and give you a bulk Excel / CSV import so a large price list is quick to load. It comes with a free hosting plan and 1 year of bug & error support. The domain is arranged by you (it is not on our side), and we will help connect it to the store.

Customer-facing store

- Home page with banners, offers, featured items & shop-by-category tiles
- Categories and sub-categories - fruits & vegetables, dairy, staples & grains, snacks, beverages, household, personal care and more
- Product listing with search, sort and filters (category, brand, price)
- Product detail page with image gallery, weight / pack variants, price, MRP and savings
- Weight & pack variants (500g, 1kg, 5kg, pieces, litres) each with its own price and stock
- Out-of-stock items clearly marked so customers aren't disappointed at checkout
- Add to cart with quantity stepper and a live cart total
- Delivery pincode check so customers know up front whether you deliver to them
- Coupon / promo code entry at checkout
- Customer accounts - signup & login, saved addresses, order history and one-tap reorder

- Content pages: about, contact and policy pages (delivery, returns, privacy)
- Fully responsive - built mobile-first, since most grocery orders come from phones

Payments & checkout

- Payment gateway integration (Razorpay / PayU / Instamojo - your choice)
- Accept UPI, debit & credit cards, net banking and wallets
- Cash on Delivery option that you can switch on or off
- Secure, PCI-compliant hosted checkout - card details never touch your website
- Automatic payment success / failure handling with the order status updated accordingly
- Minimum order value enforced before checkout
- Delivery charge rules - free above a set order value, flat fee below it
- Order confirmation on screen, by email and on WhatsApp

Delivery & orders

- Serviceable pincodes that you control from the admin panel
- Delivery slot selection (e.g. morning / evening) with the slots you define
- Order tracking for the customer - placed, packed, out for delivery, delivered
- WhatsApp order updates at each stage so customers stay informed
- Stock reduced automatically as orders are placed
- Order notes field for customer instructions (e.g. ripe bananas, no plastic bags)

Admin panel

- Secure admin login with a dashboard showing today's orders, sales and low-stock items
- Products - add, edit, remove; set price, MRP, unit, pack variants, photos and status
- Bulk product upload and price update via Excel / CSV - essential for a large grocery list
- Categories & sub-categories - create, rename, reorder and set their images
- Stock management with low-stock alerts and quick in-stock / out-of-stock toggles
- Order management - view every order, its items, payment status and customer details; update status through to delivered
- Invoices / order slips you can print for packing and delivery
- Customers list with their order history

- Coupons & offers - percentage or flat discount, minimum order, validity dates and usage limits
- Delivery settings - serviceable pincodes, delivery slots, delivery charges and minimum order value
- Homepage banner & featured-product management
- Sales reports - by date, by product and by category, exportable to Excel
- A guided walkthrough and handover so your team can run the store confidently

Design, SEO & delivery

- Clean, trust-building design matched to your brand colours and logo
- Mobile-first build optimised for fast loading on phone data
- Basic on-page SEO - page titles, meta descriptions, clean URLs and image alt text
- WhatsApp click-to-chat button for quick enquiries
- Testing across major browsers and devices before launch
- Deployment on a free hosting plan and help connecting your domain
- 1 year of support for bugs & errors after launch

What's included & what's not

Included in this package

- Responsive online grocery store + full admin panel
- Unlimited products & categories you can add from the admin panel

Terms & next steps

Payment: 40% advance to start, 30% at midway, 30% on delivery (or as mutually agreed).

- All prices are in Indian Rupees (INR) and are one-time for the work quoted.
- The domain is not on our side - it is arranged and paid for by the client directly; we will help connect it to the store.
- There is no limit on the products or categories you can add from the admin panel. We set up 100 products at launch and provide a bulk Excel / CSV import for the rest.
- Product photos, names, units and the price list are provided by the client.
- The payment gateway account is opened in the client's name with the client's KYC; its transaction fees are charged by the gateway and are not part of this quote.
- WhatsApp order updates are sent through a click-to-send / business messaging setup; if a WhatsApp Business API account is required, its subscription and per-message charges are paid by the client.
- Any SMS / email / OTP sending service subscription is arranged and paid for by the client.
- Deliveries are managed by the client's own staff; courier / delivery-partner API integration and a delivery staff app are separate scope.
- Timelines begin once the content, product list and advance payment are received.
- 1 year support covers bugs & errors only (things that stop working). It does not cover content

changes, new features or redesigns.

- Hosting is provided on a free plan; upgrading to paid hosting (for higher traffic or needs) is optional and charged separately.
- Prices are exclusive of GST, if applicable.
