Overview

This document lists the complete set of features we can design and build for a custom, full-stack multi-vendor e-commerce platform - the kind of marketplace where many suppliers list their products and buyers shop from all of them in one place, similar to Meesho. It is delivered as two dedicated apps - a Buyer app and a Supplier app - backed by a powerful Admin panel and an optional web store. Everything below is custom coded and owned by you; no per-order commission is charged by us. Pricing and timeline are shared separately once you confirm which features you want.

What the platform includes

- Buyer app - Android & iOS (React Native / Flutter), for shoppers
- Supplier app - Android & iOS, for sellers to list & manage orders
- Admin panel - web dashboard to control the entire marketplace
- Web store - responsive website so buyers can also shop from a browser
- Backend, database & APIs powering all of the above

Full feature list

Buyer app

- Quick sign up & login with mobile number + OTP (and social login)
- Personalised home feed with banners, categories & trending products
- Powerful search with filters, sort, and category / sub-category browse
- Product pages with image gallery, variants (size/colour), price, delivery estimate, ratings & reviews
- Add to cart, wishlist / save for later, and recently viewed
- Smooth checkout with multiple saved addresses
- Multiple payments: UPI, cards, net-banking, wallets & Cash on Delivery
- Order tracking with live status and delivery updates
- Easy returns, replacement & refund requests
- In-app wallet, coupons and reward points
- Rate & review products, upload review photos
- Notifications for offers, order updates & price drops
- Help / support chat and order-level query raising

Supplier (seller) app

- Supplier registration with GST, bank & KYC document upload
- Onboarding approval flow controlled by admin
- Add / edit products: images, variants, price, stock, description
- Bulk product upload via catalogue / spreadsheet
- Inventory & stock management with low-stock alerts
- Order management: accept, pack, print label & mark ready to ship
- Live view of new, pending, shipped, delivered & returned orders
- Earnings dashboard with settlements, payouts & deductions
- Returns / RTO (return-to-origin) handling
- Performance score - ratings, cancellations, on-time dispatch
- Promotions: run discounts & join campaigns set by admin
- Notifications for new orders, payments & policy updates
- In-app support and dispute raising

Admin panel (super admin)

- Full dashboard: sales, orders, active users, top suppliers & products
- Approve / reject / suspend suppliers and manage their KYC
- Manage the master catalogue, categories, brands & attributes
- Review & moderate products before they go live
- Order oversight across every supplier, with manual intervention
- Commission / margin setup per category or per supplier
- Supplier settlements & payout processing
- Coupons, offers, banners & campaign management
- Customer & supplier management (block, verify, message)
- Returns, refunds & dispute resolution centre
- Content management - pages, FAQs, policies, home layout
- Roles & permissions for staff / sub-admins
- Reports & exports for accounts and operations

Payments, wallet & settlements

- Payment gateway integration (UPI, cards, net-banking, wallets)
- Cash on Delivery (COD) with COD limits & verification
- Buyer wallet, refunds to wallet or source, and reward points
- Automated supplier settlement after delivery / return window
- Commission, shipping & tax deductions handled per order
- Payout reports and downloadable statements

Catalogue, search & discovery

- Unlimited products, categories and sub-categories
- Product variants (size, colour, weight) with per-variant stock & price
- Smart search with auto-suggest, spelling tolerance & filters
- Sort by popularity, price, newest, discount & rating
- Personalised & 'similar products' recommendations
- Featured, trending and category-wise curated collections

Cart, checkout & orders

- Single cart across multiple suppliers, split into shipments
- Address book with pin-code serviceability check
- Coupon & wallet application at checkout
- Order confirmation, invoice generation & order history
- Cancellation, return, replacement & refund workflows
- Guest browsing with login required only at checkout

Shipping & logistics

- Courier / logistics partner integration (e.g. Shiprocket-style)
- Automatic shipping-rate & serviceability by pin-code
- Shipping label & manifest generation for suppliers
- Real-time tracking synced to buyer & supplier apps
- RTO (return to origin) and failed-delivery handling

Reselling & share-to-earn (Meesho-style)

- Share any product to WhatsApp, Facebook & Instagram in one tap
- Resellers add their own margin on top of the supplier price
- Track shared orders, margins earned & payouts
- Downloadable product images & catalogues for sharing
- Reseller earnings wallet and withdrawal to bank

Notifications & communication

- Push notifications on both apps for orders, offers & updates
- Transactional SMS / email / WhatsApp for key events (optional)
- In-app support chat and ticketing
- Admin broadcast messages to buyers or suppliers

Security, quality & technology

- Secure authentication, encrypted data & role-based access
- OTP verification and fraud / abuse checks
- Scalable cloud architecture that grows with your orders
- Fast, responsive apps built with React Native / Flutter
- Clean REST APIs and a maintainable, well-documented codebase
- Full source-code ownership handed over to you

Ratings, reviews & trust

- Product ratings & written reviews with photos
- Verified-purchase badge on reviews
- Supplier rating & quality score visible to buyers
- Report / flag inappropriate products or reviews

Marketing, offers & growth

- Coupon codes, flat & percentage discounts, free-shipping offers
- Flash sales, deals of the day & festive campaigns
- Referral program - invite friends & earn
- Push notifications, and optional SMS / email / WhatsApp campaigns
- Banners & promotional placements managed from admin
- SEO-ready web store for organic traffic

Reports & analytics

- Sales, revenue & order analytics with date filters
- Best-selling products, categories & top suppliers
- Buyer behaviour, funnel & retention insights
- Supplier performance and settlement reports
- Exportable reports (CSV / Excel) for accounting

Delivery & requirements

Delivered by Bhama Vision

- Complete UI/UX design of both apps, admin panel & website
- Full stack development - apps, backend, database & APIs
- Integration of the third-party services listed alongside
- Testing, bug fixing and app-store / server deployment
- Source-code handover, documentation & basic training

On client's side (third-party)

- Domain, hosting / cloud server and their running costs
- Payment gateway account & its transaction fees
- SMS / email / WhatsApp & OTP service subscriptions
- Logistics / courier partner account and shipping charges
- Google Play & Apple developer accounts, and any paid API / plugin

How we work & next steps

Everything above is fully customisable - we can start with a focused first version (MVP) and add features in phases, or build the complete platform in one go. Once you shortlist the features you want, we will share a detailed proposal with scope, timeline and pricing, followed by design mockups for your approval before development begins.

- You review this feature list and mark what you need
- We finalise the scope together on a quick call
- We share a detailed quotation with timeline & pricing
- On confirmation, we begin design, then development in phases
