Overview

A complete, ready-to-launch online store for a single seller with up to 3 products set up for you. Customers browse your products, add them to the cart and pay securely through an integrated payment gateway using UPI, cards or net banking. All your social media channels are connected to the store, so visitors can follow and share your products, and your posts help bring traffic back to the site. A backend admin panel lets you manage products, prices, photos and orders yourself. We also set up Google Analytics 4 and Google Search Console so you can see exactly how many people visit, what they buy and how your store performs on Google search. It comes with a free hosting plan and 1 year of bug & error support. The domain is arranged by you (it is not on our side), and we will help connect it to the store.
