DATE

11 Aug 2026

VALID UNTIL

26 Aug 2026

PREPARED FOR

Confidential

Overview

A complete demand-first ('reverse') marketplace. Customers describe what they want in a simple chat; nearby verified businesses compete with real offers; and for everyday goods, Amazon products appear instantly with affiliate links. Includes the customer app, a multi-user business panel, an affiliate engine and a full admin panel - fully responsive across mobile, tablet and desktop.

Customer app - buyer experience

- Chat-based home screen: post any want in plain language
- Intent understanding to detect category, attributes, budget & location from the customer's message
- Live matched listings and competing offers shown in chat
- Side-by-side offer comparison with quick filters (budget, brand, distance, delivery, rating)
- Location-aware, nearby-first results
- Category browsing (Automotive, Home, Insurance, Travel, Electronics, Healthcare, Real Estate & more)
- Saved / active wants, in-app messaging with sellers, ratings, profile & real-time notifications
- Sign up & login with email/phone + OTP verification

Business panel - seller portal (multi-user)

- Separate, verified business login & organisation onboarding
- Multi-user team with roles (Owner / Manager / Staff / Viewer)
- Dashboard with KPIs: listings, leads, views & deals won
- Category-driven listing creation - each category shows only its relevant fields, with photos & location tagging
- Matched buyer requests (leads) delivered to the business

- Offer builder with reusable templates to respond & win
- Listing management: draft, edit, pause, relist
- Performance analytics and subscription plan / billing view

Affiliate / Amazon module

- Auto-fetch of Amazon products for everyday-goods queries
- Affiliate (Associate) tag attached to every product link
- Results rendered as cards inside the customer chat
- Caching layer to respect Amazon API rate limits
- Routing logic: business listings vs affiliate products

Admin panel

- Manage categories and their dynamic field schema
- Verify, approve or suspend businesses
- Moderate listings, offers and reported content
- Configure the Amazon affiliate settings
- Platform-wide analytics and reports
- Manage users, plans and payouts

Design, technical & delivery

- Modern, responsive UI/UX across mobile, tablet & desktop
- Secure authentication, roles & data handling
- Search & geo-matching for fast, relevant results
- Deployment to the client's hosting and full handover
- Testing & bug fixing before go-live

Support & maintenance

- 1 year of support for bug fixes and non-functional issues (anything that stops working)
- Does not include new features, content changes or redesigns (available as a separate retainer / change request)

Scope & requirements

Delivered by Bhama Vision

- Complete UI/UX design & development of every panel listed
- Database design and all data models
- Integration of the third-party services listed alongside
- Deployment to the client's hosting / server + handover
- Testing and bug fixing before launch
- Source code, documentation and a handover walkthrough

On client's side (third-party)

- Domain and web hosting / cloud server (and its monthly cost)
- AI / LLM API subscription & usage charges for the chat assistant (e.g. OpenAI / AWS Bedrock)
- Amazon Associates account and affiliate-program approval
- Maps / geolocation API keys & usage (e.g. Google Maps)
- SMS / OTP verification service subscription
- WhatsApp Business API (if WhatsApp entry is required)
- Payment gateway account and its transaction fees
- App Store / Play Store developer accounts (if mobile apps are added)
- Any other paid API, plugin or third-party subscription

Investment

TOTAL · Complete Platform

WantX Reverse Marketplace - Customer app + Business...

Delivery: 45-60 working days

₹75,000

one-time (design & development)

Terms & next steps

Payment: 40% advance to start, 30% at midway, 30% on delivery (or as mutually agreed).

- All prices are in Indian Rupees (INR) and are one-time for the design & development work quoted.
- All third-party subscriptions (hosting, domain, AI/LLM API, Amazon Associates, maps/geolocation, SMS/OTP, WhatsApp API, payment gateway) are arranged and paid for by the client directly.

-
- AI assistant and other API usage are recurring costs billed by the provider to the client based on usage.
 - Timelines begin once content, access and the advance payment are received.
 - Prices are exclusive of GST, if applicable.
