Overview

A professional B2B website for a food-packaging items manufacturer (cups, plates, containers and more) with a backend to manage products, blogs and images on your own. The site is enquiry-based - there is NO online payment; instead, buyers send a quote / enquiry that reaches you directly on WhatsApp and email. The highlight is a custom design editor that lets customers design their own products - pick an item, add their logo, text and artwork, choose colours, preview it, and send the finished design along with their enquiry. It comes with a WhatsApp chat button, a free hosting plan and 1 year of bug & error support. The domain is arranged by you (it is not on our side), and we will help connect it to the website.

Customer-facing website

- Home page with banners, product highlights & categories
- Product catalogue - cups, plates, containers, bowls, boxes, etc. with specifications and sizes
- Product detail pages with image gallery, materials & minimum-order details
- Enquiry / request-a-quote form (name, company, product, quantity, message) - no online payment
- WhatsApp integration - click-to-chat button and enquiries sent to your WhatsApp / email
- Blog / news section to share updates and build trust
- Content pages: about, manufacturing, certifications & contact
- Fully responsive across mobile, tablet & desktop

Custom design editor (highlight)

- Customers pick a product (cup, plate, container, etc.) to customise
- Upload their logo and add custom text with font & colour options
- Add artwork / images and position them on the product
- Choose base colours and see a live preview of the design

- Save / download the preview and attach it to an enquiry
- The finished design and specs are sent with the enquiry so you can quote accurately

Backend admin panel

- Secure admin login for your team
- Add, edit and remove products, categories & specifications
- Manage product images and the website gallery
- Write, edit and publish blog / news posts
- View and manage enquiries (with the attached custom designs)
- Homepage banner management
- A guided walkthrough and handover so your team is comfortable using everything
